Mr. Bryant, I apologize for not getting back to you sooner. There is no one else to contact as I take care of the web page. This page has not been on my website for approximately 2 years; However, it is still on my server.

This is my story of how I was treated by the asbestos litigation Attorney's.

I believe it was in 2019 that I was diagnosed with asbestosis. In doing research on asbestosis, I was contacted by an asbestos litigator / law firm from Boston who said they could help me. After about a year of filling out all the forms and getting the paperwork done, I was told that this law firm could not represent me because I was not sick enough!?

I was also told that my case had to be refiled within two years otherwise I could not refile my case. This means I had to get sick enough to be accepted by the asbestos litigation committee. Even though I have documentation showing that I hauled asbestos out of the asbestos mines as shown on my website with documentation to prove it.

Here's the problem: I had to leave New York because my oxygen levels kept going down into the low 80s upper 70s which makes it very hard to think or function. The hospitals in New York run their Asbestos testing in the controlled environment which helps you breathe (air conditioned (not everybody has air conditioning)).

Now that I moved to the West Coast my oxygen level usually stays mostly at 96 even when I take a two mile walk which is a mile and a half further than I could in New York.

I do not want people that look at my website to think that they can file a claim with the asbestos litigation and then run into the same situation with not being sick enough!

What good is the money when you're next to being dead or dead it does not ease the pain of what you've been through.

If the asbestos attorneys that you deal with are willing to help me, I have no problem putting the Asbestos page back up and referring people to them.

I am also working on starting the YouTube channel where I'm going to talk about my poisoning by both the asbestos and the polystyrene food containers. Here's a link to what my website looks like now:

http://www.comfortncolor.com/HTML/All_States_Counties_And_Cities.html

Sincerely,

Charles Lake

Hi again,

This is Jacob Bryant and I just wanted to follow-up on my email from last week about the possibility of adding a link to our [Asbestos Exposure Guide](#). I'm sure you are busy, but if this is something you are interested in I look forward to your reply.

Also, if there is someone else I should be in contact with I would appreciate you pointing me in the right direction.

Thank you!

Jake

-----Original Message-----

Hi there,

This is Jacob Bryant and I came across the helpful information you shared about asbestos on your page at <http://www.comfortncolor.com/HTML/AsbestosPage.html> and was wondering if you were open to adding new resources to your site.

As you know, asbestos is a dangerous mineral that was extensively used in almost everything up until a couple of decades ago. For this reason, asbestos is still lurking in many places, including building, military products, and even schools. That's why we wanted to make a guide that details asbestos exposure and the cancer it causes. Check it out:

Asbestos Exposure - lanierlawfirm.com/mesothelioma/asbestos-exposure/

A ton of work was put into it. If you think this guide could be helpful for your readers, would you consider sharing a link to this somewhere on your page? I'm sure you get a lot of requests like this, but I think it may be worth a look.

Let me know if you have any questions or thoughts about this.

Thank you so much for your time. Have a great day,

Jake
