## ◆ AI Overview

In the US, breast cancer statistics by year show a recent increase in incidence, particularly in women under 50, while the overall death rate has continued to decline, though at a slower pace in recent years. **Estimated new cases for 2025 are around 316,950, and deaths are expected to be about 42,170.** Incidence rates have increased 1% annually overall between 2012 and 2021, with a steeper rise of 1.4% per year in women younger than 50.

## Incidence (New Cases)

- **Overall:** Incidence increased by 1% per year from 2012 to 2021.
- **Women under 50:** A steeper increase of 1.4% per year was observed during the same period.
- **Younger women:** Incidence among women younger than 45 increased by an average of 0.7% per year from 2001 to 2022.
- **2025 Estimate:** Approximately 316,950 new cases are estimated for 2025.

## Mortality (Deaths)

- **Overall:** The overall breast cancer death rate decreased by an average of 1.6% per year between 1999 and 2020.
- **Recent trend:** The rate of decrease slowed to 1.4% per year between 2008 and 2020, compared to 2.2% per year between 2002 and 2008.
- **2025 Estimate:** An estimated 42,170 deaths from breast cancer are expected in 2025.

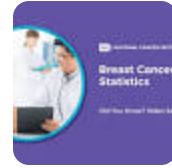

## Other Statistics

- **Metastatic cases:** The incidence of metastatic female breast cancer increased from 2001 to 2021.
- **Racial disparities:** There is a significant disparity in mortality rates, with Black women experiencing the highest rates, according to [Breast Cancer Prevention Partners](#).
