## Polymers

### Butyl

With more than 80 years of experience, we produce butyl rubber to make it possible for key industries, such as tire manufacturing, automotive, and pharmaceutical to adapt quickly to the changes of today's needs and future challenges.

[Learn more >](#)

### EPDM rubber

Vistalon™ ethylene propylene diene (EPDM) rubber is used in a wide variety of applications, offering processing and finished product performance beyond the capabilities of natural and general-purpose synthetic rubbers.

### Polyethylene products

Helping to deliver tomorrow's performance today for a range of healthcare and medical, packaging, agricultural, building and construction, and industrial applications.

[Learn more >](#)

### Polymer modifiers

Choose ExxonMobil's polymer modifiers for improved performance and increased production efficiency of films, compounds, nonwovens and molded/extruded products.

### Polyolefin plastomers and elastomers

### Polypropylene

Benefit from a full range of

### Escorez™ tackifiers

### Thermoset systems

Explore our broad range of polyolefin elastomers and plastomers. Benefit from our history of innovation and ExxonMobil's continued commitment to our customers with advanced technology and global supply.

polypropylene products, technical expertise and reliable, worldwide supply. Choose from homopolymers, impact copolymers and random copolymers.

[Learn more >](#)

ExxonMobil offers a broad product portfolio of polymers and premium Escorez™ tackifiers with a focus on hot-melt adhesives (HMA) for packaging applications.

[Learn more >](#)

Proxima™ systems bring improvement throughout the value chain, benefiting converters and end-users. Their super-low viscosity and controllable fast cure have been found to streamline production across a broad set of applications.

## Chemicals and fluids

### Synthetic base stocks

Learn how we support your innovation with reliable supply of world-class synthetic base stocks and formulation expertise.

[Learn more >](#)

### Branched alcohols

Exxal™ alcohols are branched, primary alcohols used to synthesize surfactants, polymer additives, lube and fuel additives, adhesives, and other industrial products.

[Learn more >](#)

### Branched higher olefins

Higher olefins are reactive intermediates used to manufacture products used in lube oil additives, surfactants and agricultural chemicals to coatings and corrosion inhibitors.

[Learn more >](#)

### Neo acids

ExxonMobil™ neo acids exhibit highly branched structures creating steric hindrance that gives excellent thermal and hydrolytic stability in derivatives.

[Learn more >](#)

### Plasticizers

ExxonMobil Product Solutions is a major global producer of plasticizers, with more than 50 years of experience in the flexible PVC market.

### Solvents and fluids

ExxonMobil Product Solutions offers a wide selection of hydrocarbon and oxygenated fluids.

[Learn more >](#)

### Linear alpha olefins

Learn more about how ExxonMobil Product Solutions' linear alpha olefins (LAO) can be utilized to make polyethylene,

### Univolt™ transformer oils

Learn how Univolt™ transformer oils are formulated to improve performance and extend transformer life.
